

Pedagogical continuity in kindergarten

How to get organized ?

Daily activities

PARENTS

Mathematics

- Count and play with numbers
- Solve simple problems
- Explore and understand the meaning of a day / week / month
- Complete jigsaws
- Play board games

Communication and language

- Say or sing nursery rhymes, songs, poems
- Read books
- Ask your child to talk about a story he/she listened to or a memory

Everyday life

- Lay the table, name and count the objects with your child
- Cook and bake: name the ingredients and say the different steps of the recipe so that your child can repeat them
- Encourage your child to get dressed on his/her own and say the words of the clothes out loud

Expressive arts

- Invite your child to draw (a character, an object from his/her everyday life or what he/she wishes) and colour in drawings
- Manipulate PlayDo (or homemade dough) to make different shapes (balls, rolls...)

Building games: (Clipo/Duplo/Lego/Kapla)

Daily homework

Being a teacher is difficult and requires experience and expertise.

Dear parents, do not worry: you are not asked to teach. However, you can help your child to continue learning.

The following resources can be of help to you: you can scan the QR code on your smartphone or pad or use this link to access many activities : <https://view.genial.ly/5e7aff13f9dc210d8ad72285/presentation-maternelle-continue-pedagogique>

Your child can undertake these activities at his/her own pace, and yours. **Mathematical and language activities are encouraged** on a daily basis, these can be done while **playing games**.

⇒ You can schedule a « learning time » in the morning and again in the afternoon.

⇒ Your child will work in a quiet, dedicated area.

⇒ **Your child is too young to undertake these activities without your help and support.**
